Explanatory notes

This application is to divide a water share. Dividing a water share will:

- Cancel the water share being divided; and
- Create new water shares for the volumes nominated.

The combined volume of the new water shares must equal the volume of the water share being divided.

Dividing a water share does not change the ownership. The owners of the water share being divided will be the owners of each of the new divided water shares.

If the water share being divided is formally associated with a water-use licence (WUL) the new divided water shares will be formally associated with the WUL.

Encumbrances

Each of the new divided water shares will inherit all encumbrances on the water share being divided. This means:

- Mortgages on the water share being divided will be carried over onto each of the new divided water shares; and
- A limited term transfer on the water share being divided will be carried over onto each of the new divided water shares.

Allocations

Each of the new divided water shares will be linked to the same allocation account (ABA) as the water.

All carryover and seasonal allocation against the water share being divided will be pro rata against the new divided water shares.

Lodging the application

All owners of the water share being divided must sign the application.

Companies must attach an ASIC company extract that is less than 12 months old. Two directors or one director and secretary are required to sign.

Incorporated associations must attach an incorporated association extract that is less than 12 months old. The listed secretary is required to sign.

The water corporation will notify the water share owners and the lodging party by letter of the new water shares when the application has been processed.

What is happening under the Water Act 1989

This form is an application, where applicable, for the Minister's approval to:

- Divide a water share (under section 33Y(1)); and
- Give a standing direction (under section 33TA).
